Total Excel Files Converter (Updated 2022)

Total Excel Files Converter is a reliable tool that can help you save the data from XLS or XLSX files to other formats. The program can handle processing several files at the same time, regardless of the version of Microsoft Excel they were created with. You may easily select from the list of available output formats. Support for batch conversion Total Excel Files Converter allows you to load large amounts of files, from one or several folders stored on your computer. You can manually add all the spreadsheets or load an entire folder. You may arrange the list of input files by adding or removing them with a few mouse clicks. The supported file formats include XLS, XLSX, XLSB (Excel binary workbook), web page (HTML), Excel template (XLT/XLTX) or Macro-enabled Template (XLTM). Moreover, you can convert the files to XML, TXT, comma separated, PDFs or XPS documents. Organize the input list Total Excel Files Converter applies the same output configuration to all the files in the list. This is why you need to make sure that all the files displayed in the program require the same changes. The program cannot convert protected spreadsheets and does not prompt the dialog box in which you can enter the password. The result of the conversion is displayed in the program's interface, alongside with each entry in the list. The application indicates whether the conversion of a particular file was successful or if certain errors were encountered. User-friendly application Total Excel Files Converter is simple to use, features a straightforward interface and enables you to select the output folder that is common to all the converted files. You can even select a larger folder since the program can automatically create an output directory for the converted files. The location is easy to identify since its name is the current date. Total Excel Files Converter is a reliable tool that can help you save the data from XLS or XLSX files to other formats.
